- Static: "2027 early-bird offer" card — CTA: DM "2027"
- Reel: "Naye saal se pehle apna 2027 content calendar ready karo" — CTA: Link in bio

Hashtags: #YearInReview #2027Planning #ChristmasMarketing #NewYearGoals #DigitalMarketingIndia #ContentCalendar #InstagramGrowth

Notes for Implementation

- Maintain the **80/20 rule** monthly — flag any month exceeding 20% promotional content (October–December will naturally run promo-heavier; balance with extra value content in June–September to average out over the year).
- Keep **20–30% of each month's calendar unlocked** for trend-jacking and reactive content — the plans above cover the ~70–80% "always-on" baseline.
- Batch-produce Reels **2–4 weeks ahead**; festival creative (Oct–Nov especially) needs **7–15 days** for UGC, edits, and approvals — start Diwali content by early October.
- This structure is copy-paste ready for Google Sheets, Notion, or Airtable — each month can become its own row/section with sub-columns for the fields above.
